

## Project Connect

### HOW TO GET CONNECTED

#### First time use – Information on the label of box

1. Battery is already inserted into device. Please make sure you recharge the battery overnight.
2. Hold the Power key for 3 seconds until all LED indicators illuminate in blue.
3. Connect your Wi-Fi device to your Mobile Hotspot.
4. On your computer or other Wi-Fi enabled device, search for available Wi-Fi networks and select network name (SSID) "Coolpad Surf + the last 4 digits of IMEI".

#### From a Windows PC:

- Left-click Wireless Network Connection on the taskbar to view available networks.
- Choose the SSID from the list of available networks.

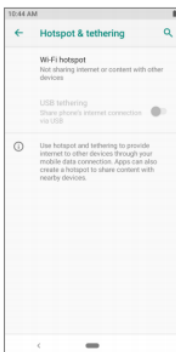

#### From a Mac computer:

- Select **System Preferences > Network > Airport.**
- Click **Advanced to choose SSID from the list of available networks.**
- Choose the SSID from the list of available networks.

#### From an iOS device:

- Go to **Settings > Wi-Fi.**
- Choose the SSID from the available networks.
- From an Android device:
- Go to **Settings > Wi-Fi settings.**
- Choose the SSID from the available networks.

5. Enter the Wi-Fi password, which is the

S

- Swipe Up on Home button twice, tap **Settings.**
- Tap Network & Internet > Hotspot & Tethering
- Tap the slider to turn Wi-Fi hotspot, or USB tethering on 
  - Hotspot is enabled.
    - To disable hotspot or tethering, tap the slider again .
  - Tethering is turned on and your phone's internet connection can be shared with a connected device.
- The best way to keep using the phone as a hotspot is to have it connected to a power supply.
